

A BRIGHT IDEA, INC.

FOG FREE REFLECTIONS

A PERFECTLY CLEAR VIEW

Shaving in the shower saves time and provides the best close shave. However, using a traditional shower mirror to shave can be ineffective and hazardous, making this simple task quite a challenge. Look no further than *Fog Free Reflections* state-of-the-art in-shower defogger for an inexpensive, smart solution to this age-old problem.

Fog Free Reflections™ are ultra-thin, flexible, carbon/Mylar® panels that easily mount behind the mirrored tile in your shower and deliver a fog-free view. What better way to differentiate your business, give your homeowners a luxurious bathroom experience and remind them of your attention to detail?

A STEP ABOVE THE REST

Fog Free Reflections give your homeowners the true luxury of a hassle-free morning. Now your homeowners can get the perfect warm-water shave without missing a spot and avoid those nasty nicks and cuts while showering. Cleansers and facial scrubs are far easier to apply. They can even brush their teeth in the shower, shortening precious “get ready” time. With the flip of a switch, *Fog Free Reflections* safely and gently heat the mirror to keep fog from forming, giving your homeowners a crystal clear view during every steamy shower.

FAST & EASY TO INSTALL

Fog Free Reflections are simple to install...all you need is your mirror and our defogger. The thin panel can be applied to the back of any mirrored tile in a shower using a non-heat based adhesive. Using a step-down transformer, the unit can be wired to the vanity fixture or a separate switch — it's your choice!

A CLEAR WINNER FOR ALL

Fog Free Reflections units mount flush with your existing tile for added safety. The units only use 8 watts of power, and the low voltage (12v) prevents electrical shocking. You choose the size, shape, location and height of your mirror that work best with your design. The standard unit size (4" x 12") accommodates a 6" x 14" or larger mirrored tile. Custom shapes and sizes are available upon request.

In addition, *Fog Free Reflections* durable units:

- Heat to a range of 100-105 degrees Fahrenheit
- Are guaranteed for 10 years
- Can be used on any type of mirrored tile

Plus, *Fog Free Reflections* offer defoggers that mount behind a bathroom vanity or a framed mirror and are available in four standard sizes.

THE BOTTOM LINE

Fog Free Reflections allow homeowners to maximize and enjoy time in the shower, making it easier to shave, cleanse and get ready — no matter how steamy the shower!
